

OO Scale House

Thanks for purchasing one of my kits,
This kit just requires Gel glue. Please keep parts away from children

A non super glue Gel glue is recommended

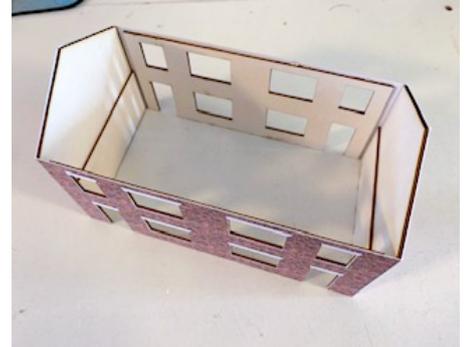

Firstly locate the 2x red brick walls and the 2x plain card window surrounds (1) and glue as shown, **Put in place first as they only fit one way.**

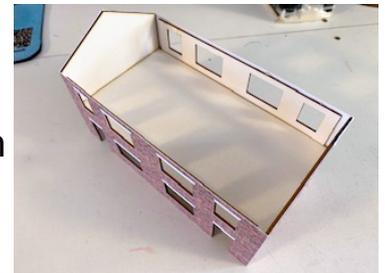

Now locate 2 Oblong and 2 end gables as shown, Glue as shown left making sure they are central and flush with the bottom, they are slightly shorter than the gables.

Now we can glue the red brick walls to the ends you just made, glue the blank sides so the supports are on the inside, dont worry if there is a slight gap in where the red brick walls join as they will be covered.

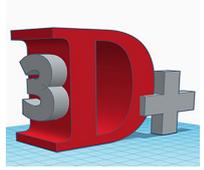

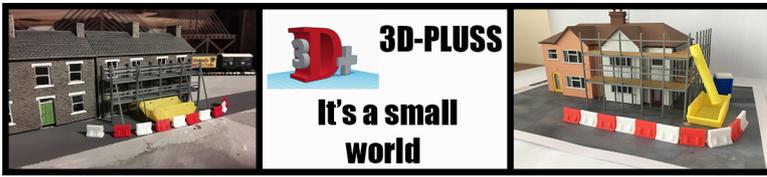

Now Run a line of glue on top the floor supports shown left, then push the floor in to place as shown right.

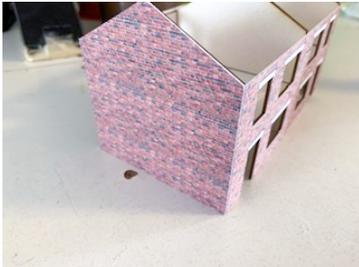

Now locate the 2 remaining oblong pieces and glue together then glue as shown left, do the same with the upper small gables shown right.

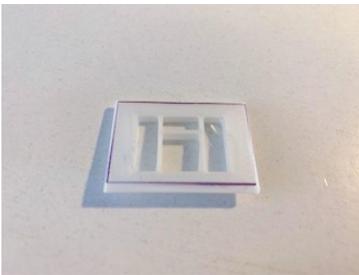

OO Scale House

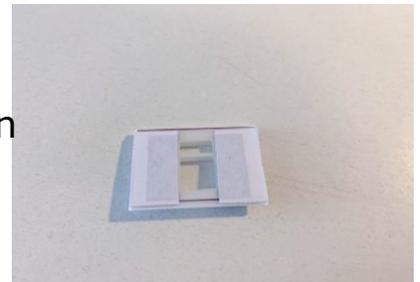

Thanks for purchasing one of my kits,
This kit just requires glue. Please keep all
parts away from children

Now glue the red brick gables on
as shown left.

Cut all the windows out and glue
as shown. if you require curtains
go to www.3d-pluss.net and you can
download free of charge.

The windows fit easily, just run a line of glue around
the window and glue in place.

Run a line of glue on top of the 3 gables and fix the roof
on, make sure you have the same overhang both ends.

don't glue the gutter but run a line of glue under the roof,
this will hold the gutter
and really help with the roof fixture.

Glue along the roof line the fix the
barge boards as shown left. then the
chimneys shown right.
