

N Scale Garage Block

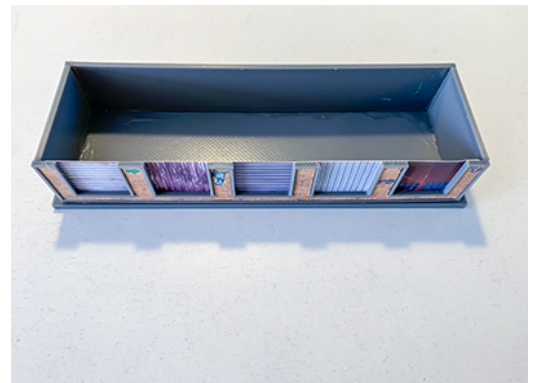

Thanks for purchasing one of my kits,
This kit just requires a **GEL** glue and
scissors.

Firstly glue the card
insets in to the plastic
wall panels (Left)
Cut the doors out then
fix as shown right

Glue the 4 walls
together making sure
the sides are on the
inside as shown left

ideally do it upside down that will make the next bit easier, now run a line of
glue around the underneath of the roof then place the walls on the roof then you
can spend a min getting the walls square and an even roof overhang,
that's it, let it dry for an hour.
